-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☒ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 2665

1. This application is in condition for allowance except for the following formal matters:

A. The drawings are objected to because the labeling for block 902 in Figure 9 should be changed from “DEPARTURE WHICH LAN APPARATUS ARE PROXIMAL TO DESTINATION WIRELESS APPARATUS” to -- **DETERMINE WHICH LAN APPARATUS ARE PROXIMAL TO DESTINATION WIRELESS APPARATUS** --.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

B. Claims 7 and 13 are objected to because of the following informalities:

In claim 7, line 11, “and by” should be changed to -- and --.

In claim 13, line 12, “for to” should be changed to -- to --.

Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gilhousen et al., Rich, Baker et al., and Guey are cited to show the common feature of Receiver architecture for transmit diversity in CDMA system similar to the claimed invention.

Shu et al. '888 & '874, and Shu are cited to show the feature of message splitting and spatially diversified message routing for increasing transmission assurance and data security over a wireless network environment similar to the claimed invention.

3. The following is an examiner's statement of reasons for allowance:

Referring to claims 1-6, 13-16, all prior arts fail to disclose or suggest a method or an apparatus for communicating information for a destination wireless apparatus that is operative to communicate in a wireless local area network (LAN)) and also operative to communicate with a wireless wide area network (WAN) comprising: simultaneously transmitting same information for the destination wireless apparatus to a plurality of proximal wireless apparatus via the wireless WAN; receiving the simultaneously transmitted same information by each of the plurality of proximal wireless apparatus; and using the received simultaneously transmitted information from the plurality of proximal wireless apparatus as diversity information for the destination wireless apparatus to enhance the quality of received information for the destination wireless apparatus.

Referring to claims 7-12, all prior arts fail to disclose or suggest a method for communicating information for a wireless apparatus that is operative to communicate in a wireless local area network (LAN) and also operative to communicate with a wireless wide area network (WAN) comprising: transmitting same information by the wireless apparatus to at least one proximal wireless apparatus via the wireless LAN; re-transmitting the same information via the wireless WAN, by the wireless apparatus and by the proximal wireless apparatus; receiving the re-transmitted same information by the WAN from each of the wireless apparatus and the at least one proximal wireless apparatus; and using the received re-transmitted same information from both the wireless apparatus and by the proximal wireless apparatus to enhance the quality of received information for the wireless apparatus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

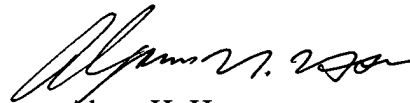

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alpus H. Hsu whose telephone number is (571)272-3146. The examiner can normally be reached on M-F (5:30-3:00) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy D. Vu can be reached on (571)272-3155. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
